### Remote/Community Isolations:

#### **Community Isolation, Community of Coleville, Mono County**

On 09/07/17 at 1728 hours, the Cal OES 9-1-1 Branch notified the California State Warning Center (CSWC) of a Community Isolation in Coleville, Mono County, due to a fiber cable burned by wildfires. The isolation is affecting landline 9-1-1 services only. The Public Safety Answering Point (PSAP) is operational. California Unified Emergency Association (CUEA) and the Cal OES 9-1-1 Branch have confirmed cellular 9-1-1 services are not affected and the population affected is approximately 308 customers.

- The Cal OES Fire Duty Officer (FDO) and Law Duty Officer (LDO) have confirmed that Mono County and Coleville residents are safe and that the fire is moving away from Coleville into Nevada.
- Per the Cal OES Southern Duty Officer (SDO), Mono County has made no request for state assistance at this time.
- At 2148 hours, Cal OES 9-1-1 Branch advised that damage to the fiber, copper and poles in Coleville is more severe than anticipated.
- Wildfires have burned through copper, telephone poles, and approximately 16,000 ft. of fiber in the Coleville area
- Technicians will continue to work through the weekend with an estimated restoral timeframe of 09/11/17.
- If the status of either landline or cellular service should change, Cal OES 9-1-1 Branch will be notified immediately.
- The CSWC made notifications per SOP.
- Cal OES Duty Officers have been advised and will continue to monitor the situation.

# **WEATHER OF CONCERN**

## **Weather of Concern**

- There is a chance for thunderstorms across the interior areas as an upper level low moves up from the south. The best chance for storms is on Tuesday, but there is also a slight chance on Monday and Wednesday, Afternoon thunderstorms will be possible across the Sierra north to Lassen Park this weekend. The primary threats will be frequent lightning and heavy downpours
- A low pressure system just off the California coast will provide western Nevada and the eastern Sierra with the right ingredients for thunderstorm development on Monday through Wednesday mainly in the afternoon/evening hours with the strongest storms on Tuesday. The main threats with these storms include lightning, strong outflow winds, brief heavy rainfall, and small hail. On Thursday, westerly winds will increase as a cold front makes its way through the region. After a few leftover showers on Thursday afternoon due to the front, drier air will work its way through bringing along with it cooler temperatures and breezier conditions. These cooler temperatures should stick around for the weekend with valleys dipping down into the 40s to low 50s and near freezing for higher elevations.
- A weather system off the Southern California coast will bring moist air northward this week. Showers and thunderstorms (along with cooler temperatures) will be possible across much of Northern California Monday through Wednesday.
- Southeast wind flow in between a ridge of high pressure and a coastal low off the CA coast will bring monsoon moisture into central CA. This will provide the ingredients and favorable conditions for showers and thunderstorms to develop this weekend. Sunday afternoon and Monday look to be the best chances for showers and thunderstorms mainly Fresno county southward.

## **Active Weather Warnings, Watches and Advisories by County:**

- <https://alerts-v2.weather.gov/counties/CA>

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

Rather moist weather anticipated the first half of this week.

Moisture and instability rotating around a low moving slowly north off the southern California coast will spread across the North Ops region today. Some showers and isolated wet thunderstorms will develop over the North Ops region this afternoon and become somewhat more widespread overnight. Precipitation may occur in any area of the region through Tuesday night, and a pause in that action is expected Wednesday with most of Wednesday's action expected over the eastern mountains. Later Wednesday a low pressure trough from off the Pacific will arrive and keep some isolated showers going over our northern and especially eastern mountains through Thursday night. Friday through the weekend looks dry except for Sunday when another trough arrives that may generate some more light precipitation in the far NW corner of the region. Temperatures will be coolest Thursday through Saturday up to around 5 degrees below normal with the warmest inland valleys in the mid 80s. Higher RH and areas of precipitation should increase overall fuel moisture across the region over the next few days, but new fire starts or holdovers will still be possible from the lightning. Some periods of gusty W to N winds may set up late this week and over the weekend.

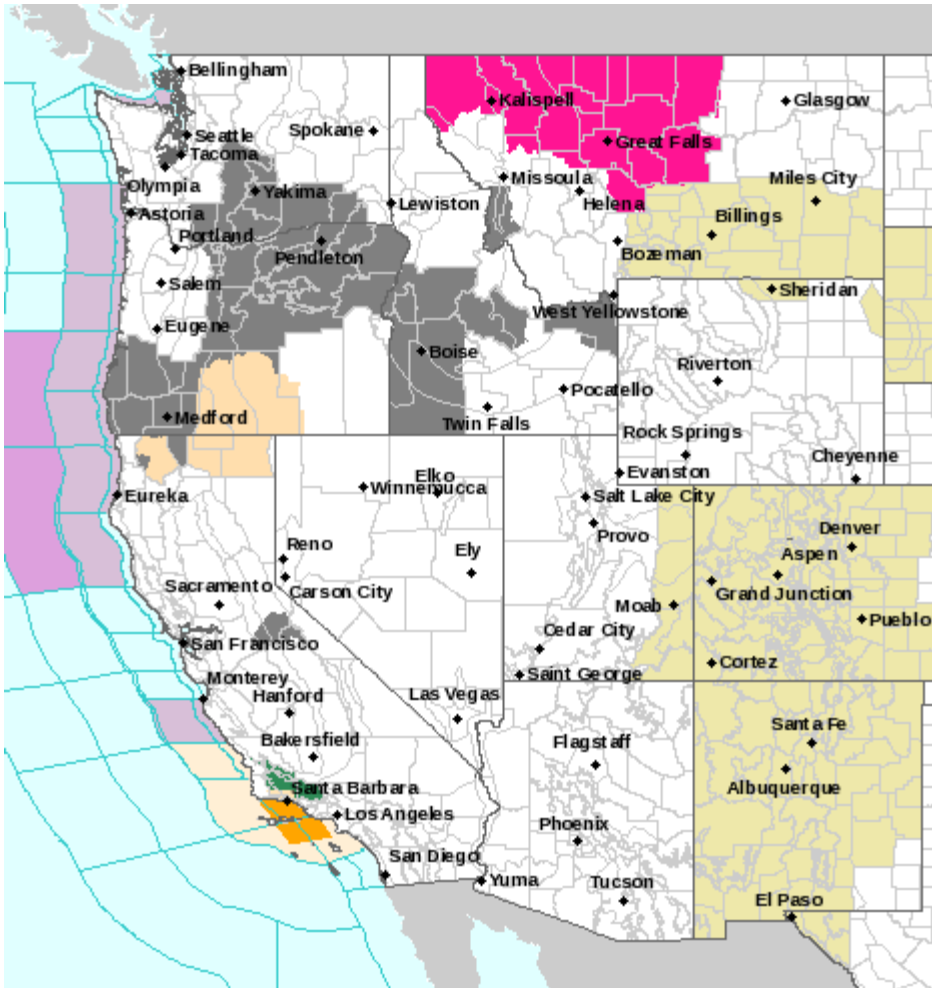

## **SOUTHERN CALIFORNIA**

Scattered showers and thunderstorms through Wednesday.

Scattered showers and thunderstorms will continue to move across the region through Wednesday as an area of low pressure sits off the coast of Point Conception. The low will open and push to the east Thursday as a Pacific trough moves inland across the West Coast ending the shower and thunderstorm threat. Temperatures will continue to be near normal through Tuesday, with mid 70s to mid 80s across the mountains and mid 80s to mid 90s in the valleys. Temperatures will cool to the upper 60s and 70s across the mountains and upper 70s and 80s in the valleys Wednesday through this weekend. Minimum humidity will be above 20% across the region through this weekend. Winds will be light through Tuesday, except there will be strong and erratic winds in and near any thunderstorms. Westerly winds of 15 to 25 mph with gusts to 40 mph will surface across the wind prone mountain and desert areas Wednesday through this weekend.
